

Sodium and Chlorine Research

Instructions: In pairs, decide who will research each element, either sodium or chlorine. Read the information card and make brief notes on your element. Then discuss your findings to each other in order to complete the other part of the Venn diagram.

Challenge: Can you think what connects them?

Key points to make notes on:

Is your element a metal or non-metal?

Which group in the periodic table is your element located in?

Which state of matter is your element?

What is the electronic configuration of your element?
