

FORCES and MOTION

During your reading on *Forces and Motion*, define the terms force and motion. Then keep track of the types of forces mentioned in the article by writing key details about each one. Then give an example, either from the reading or your own life to support the description you have written.

What is motion?	What is force?
------------------------	-----------------------

TYPES of FORCES

What is friction?	Example:
What is air resistance?	Example:
What is magnetism?	Example:
What is gravity?	Example:
