Cut out the cards below and reorganise them into the correct sequence.

Turn off the Bunsen burner.
Set the evaporating dish on a gauze and tripod.
Pour the solution into an evaporating dish.
Gently heat the solution until only a small amount of liquid remains.
Place the evaporating dish somewhere warm and allow the remaining liquid to evaporate overnight.
Allow the equipment to cool before handling.
Connect and light the Bunsen burner.

Cut out the cards below and reorganise them into the correct sequence.

Open the Bunsen burner air hole.
Gently heat the solution until only a small amount of liquid remains.
Connect a Bunsen burner.
Pour the solution into an evaporating dish.
Close the Bunsen burner air hole.
Turn off the Bunsen burner.
Allow the equipment to cool before handling.
Set the evaporating dish on a gauze and tripod.
Place the evaporating dish somewhere warm and allow the remaining liquid to evaporate overnight.
Turn on the gas and light the Bunsen burner using a lit splint.
